

COMPLETE™-SL

WOUND CARE

Single-Layer Perinatal Tissue Allografts

COMPLETE™ - SL Wound Care Perinatal Tissue Grafts are processed to retain all naturally occurring extracellular matrix components

ABOUT COMPLETE™-SL

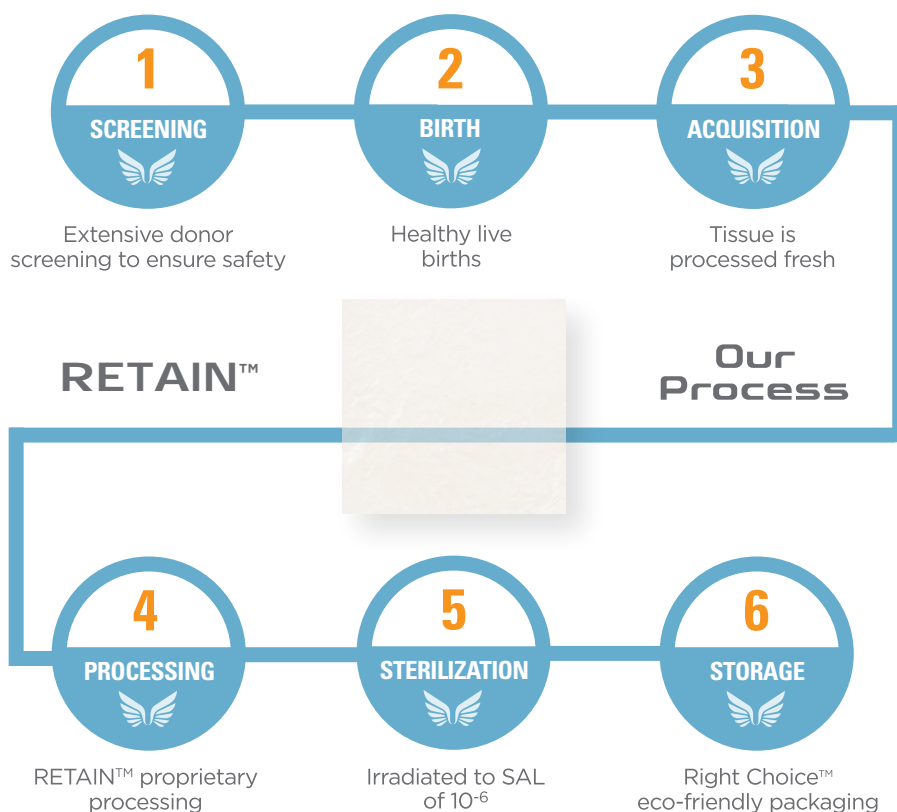

- TRG designation as a 361 HCT/P allograft.¹
- Samaritan issued HCPCS Code Q4270 for COMPLETE™-SL Graft.²
- COMPLETE™-SL is to be topically applied over the wound and it is intended to serve as a barrier and provides protective coverage, from the surrounding environment to acute and chronic wounds.

SAFETY

- Screened healthy mothers donate live birth tissue.
- COMPLETE™-SL grafts are processed in accordance with FDA regulations and AATB standards.
- Terminal Sterilization method provides sterility assurance level (SAL) of 10^{-6}

EASY TO USE

- Best in-class graft handling.
- Ambient temperature storage with a 5-year shelf-life.
- Strong thin graft conforms to irregular wound surfaces.

*The **RETAIN™** proprietary processing method eliminates harsh mechanical and chemical washes prior to sterilization to ensure maximal preservation and retention of the naturally occurring components of the birth tissue.*
